The Poet's Journal.  
A LEAF FROM THE

IV, APRIL 2, 1881.

When wood-vights love,  
Thinly lies the winter.

Where the streamlet—  
And the summer up-springs is taking hold

Through the snow-arrest, this season.

All is hushed, but—  
The world is still reported to be in

Where the crows' confid is reported to be in

Where the winter from comined asthma and

By the p—  
And the Armenians whom Turkey is par-

Over him, afraid of stirring up, in inviting an

Wheat from Greece.

It was finally decided, and to the public's satisfaction, that we are not to have an extra session of Congress.

Paper plates are coming into use next in the restaurants. They have been tried in Berlin with marked success.

The President is reported to have said that he intends sending in the name of Dr. Loring as Commissioner of Agriculture.

Village improvement societies, we are happy to state, are increasing in number as rapidly as could be expected.

Rumors of a break-up of the new Cabinet are rife, on the ground of personal dissatisfaction with Executive nominations.

The London News says that if hostilities once break out between Greeks and Turkey, they will not be restricted to those two States.

France, by the suspension of gold payments, has stopped the flow of specie from her shores, and it is now being drawn from Germany.

It appears that nearly 50,000 more Irish persons emigrated last year than the year before, in spite of the persistent advice of the land league.

The Cuckoo is a new London evening paper, which attempts to digest the news of each day in an endless series of short and piquant paragraphs.

The estate of the late Gov. Wm. Beach Lawrence is estimated at two millions of dollars, and is equally distributed among his remaining children.

The City Government has given permission to the Brush Electric Light Company to place four iron lamp posts in Sooley Square, to display the brush electric light.

The public exhibition of the fine new steel steamship Parisian, while lying in our waters, netted a handsome sum, and was a most welcome introduction of the new comer to our public.

England seems desirous of effecting an amicable settlement with the United States of the long standing fishing disputes. She will either pay a lump sum of damages or submit the question to arbitration.

Rev. Abel Silver, the oldest minister of the New Church in New England, was drowned at Prison Point, on Sunday evening last, on his return from preaching during the day at Salem. He is supposed to have left the train by mistake, thinking that the others were bound for Boston.

The first lot of strawberries—400 bushels—direct from Florida, arrived in this city on Monday, by the Savannah steamer. They were large, ripe, and in perfect condition, and sold ready at seventy-five cents to one dollar per quart.

The Senate of the United States is still in session, having organized its committees but not yet having chosen its officers. The hitch is over the Secretary and Sergeant-at-Arms. Senator Mahone, of Virginia, has made a protracted speech in defense of his course in the organization. The President has sent in several important nominations, which are strongly antagonized by the majority party, and may finally fail of confirmation.

**OUR GERMAN IMMIGRATION.**

This is now far by the largest that comes into the country. That now entering the port of New York exceeds anything recorded since the Board of Emigration was established in 1849. The figures for 1850 were 104,264, who were greater than for 1849.

The Boston school committee on salaries has reported in favor of a general reduction of their lot had been cast in the Caenacum for three years past.

Judge Joseph H. Holt, once judge advocate-general of the United States, is living at Albany, N. Y., and has recently been a member of the various State assemblies.

The post-Scoodan says he has far more respect for us than for literary men. They are illiterate, but not only by occasional disasters, it is caused by the conscious injustice of the cause, perverted old England's way.

The entire astronomical specimens purporting to the remains of early Christians, found in the South have accelerated the healing of old sores, and induced in some cases, and common diseases, political faction, and domestic discord, which are the natural outgrowth of such a statement and such a comparison.

The Boston Herald says he has far more respect for us than for literary men. They are illiterate, but not only by occasional disasters, it is caused by the conscious injustice of the cause, perverted old England's way.

The Boston school committee on salaries has reported in favor of a general reduction of their lot had been cast in the Caenacum for three years past.

—This is Mr. Bertrand's view in Boston.

—He is at present a member of the Boston House of Representatives, and casting out ten thousand dollars, will soon be ready for occupancy.

**The Poet's Corner.****THE PLANTING OF THE APPLE-TREE.**

BY WILLIAM CULLEN BRYANT.

Come, let us plant the apple-tree,  
Close the tough greenward with the spade;  
Wide let its hollow bed be made;  
There green let lawns grow, and there  
Shall stand and sing, and hide her nest;  
And press it o'er them tenderly.  
A round the sleeping infant's feet  
We'll softly fold the cradle-sheet,  
So plant the apple-tree.

What plant we in this apple-tree?  
Buds for a hundred flowers springs  
To load the May-wind's restless wings,  
When, from the orchard, he, noisily  
Drags through our open doors;  
A world of blossoms!

What plant we in this apple-tree?  
Sprouts for a hundred flowers springs  
To load the May-wind's restless wings,  
When, from the orchard, he, noisily  
Drags through our open doors;  
A world of blossoms!

What plant we in this apple-tree?  
Blossoms, where the thrush with crimson breast,  
Shall sing and shade; and, here her nest;  
And press it o'er them tenderly.

Oh! "said Helen, coolly, with her eyes  
air of innocence. "I did not notice that you  
were there, Sir."

"But you will notice the bidalgo, with the

string of titles and the rent-roll? Well,  
bidalgo are poor."

"Then I should have no use for them,"  
said Helen.

"A poor man to say, Miss Helen, that  
you would not marry a poor and untrained  
man? What is the matter with you Ameri-  
can girls? What better title is there than  
doctor? I am the doctor in the corner. There  
is a legend in my land that once the Roma  
purple was put up at auction. *Divolvo!* Is  
all this beauty for sale, too, to the highest  
bidder?"

Helen stared at him a moment, answering  
nothing.

"By the way, Clara," she said, ani-  
tively pointing him and his remarks, "did you  
see the Spanish lace Mrs. Knowles  
gave Emily? I should have liked that!"

"I am a real Apple fool of Helen  
with it," said Clara; "for, when she  
unfolded it, Helen thought, of course, it was  
all this beauty for sale, too, to the highest  
bidder."

"How can he be failing at her feet?"  
said I to Cousin Stanhope, on one of his  
Saturdays with us.

"He is lame," said Stanhope.

"And then I should have failed in love  
with her again. She had been very  
handsome, when she was a girl; but after that  
she was a widow, and Helen was the  
most beautiful woman in the room."

"The robins take you for one of them-  
selves, Helen," said Aunt Elvyn.

"In 1769, occurred what was long called  
the cold winter, when the frost  
was severe, and snows were deep. In 1711,  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1734, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1738, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1750, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1752, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1754, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1756, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1758, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1760, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1762, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1764, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1766, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1768, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1770, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1772, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1774, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1776, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1778, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1780, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1782, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1784, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1786, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1788, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1790, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1792, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1794, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1796, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1798, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1800, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1802, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1804, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1806, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1808, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1810, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1812, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1814, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1816, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1818, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1820, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1822, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1824, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1826, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1828, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1830, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1832, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1834, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1836, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1838, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1840, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1842, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1844, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1846, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1848, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1850, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1852, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1854, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1856, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1858, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1860, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1862, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1864, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1866, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1868, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1870, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1872, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1874, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1876, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1878, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1880, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1882, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1884, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1886, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1888, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1890, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1892, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1894, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1896, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1898, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1900, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1902, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1904, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1906, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1908, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1910, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1912, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1914, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1916, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1918, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1920, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1922, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1924, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1926, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1928, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1930, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1932, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.

In 1934, the frost was extreme, and  
the Danube was frozen to the bottom, and  
remained long in that state.
